Dear Parents,

We have amazing and hard-working teachers, and are confident that your child will have a great year in any teacher's classroom. Although this practice is not encouraged, we recognize the desire many parents have to be involved in this aspect of their child's education. With this in mind, we will take all suggestions into consideration, but can only make them happen if all students and teachers have the benefit of a balanced classroom. Balanced classrooms take into account class size, gender, academic abilities, behaviors and other aspects. If you are willing to let us make the best decision for your child, it is not necessary for you to fill out the parent input form.

Requests will be considered only if classroom placement of students allows classes to remain equal in size, gender, academic abilities, behaviors, and other aspects. Over the past few years it has been more and more difficult to balance classes. For this reason, each request must provide at least three equal options. **Requests without 3 equal choices listed will not be considered.** Please note, in 3rd-6th grade the teacher your child receives for the year may not be their math teacher.

If you do not want to request, but have specific concerns for your child please make an appointment to speak with Ms. Gledhill.

Request forms will be accepted **May 22nd-26th only**. (I do not deal with requests on a first come, first serve basis. I consider all requests together.) Please turn them in to the office by **noon** on May 26th. **No late or summer requests will be accepted for any reason, and changes will not be made at registration.**

Forms are available in the office. We will give forms to parents, but we **will not** send them home with students. **Remember, all requests need to be turned in by May 26th.**
